- RIGHT MOMENTUM

RIGHT TEAM, RIGHT SUCCESS

The decline of the full-time role will result in many human workers falling through the cracks, unable to earn a family-sustaining wage or progress in their skills. This may prompt renewed calls for universal basic income or another type of safety net to take the place of the full-time employer.

27% of Gen Z workers currently supplement their primary income with part-time or gig work.

PEOPLE MINT

RIGHT TEAM, RIGHT EDGE

Country	Talent Shortage Rate (Demand Exceeds Supply)	Key Market Dynamics
Slovakia	87%	Extreme demographic aging and massive technical skills drain.
Greece	84%	Mismatch between youth education tracks and modern corporate tech needs.
Japan	84%	Severely shrinking working-age population; massive gap in AI literacy.
Germany	83%	Rapidly retiring "Baby Boomer" generation leaving critical gaps in skilled trades & IT.
India	82%	**High Supply, Low Employability.** Despite a vast labor force (**617.6M**), a severe skills gap leaves 8 in 10 employers struggling to find qualified talent.
United States	~70% - 72%	Balanced on the global average; massive demand for cybersecurity, healthcare, and AI application developers.
Finland	60%	Strong domestic reskilling pipelines and high labor participation cushion the shortage.
Poland	57%	Steady regional tech hub growth helping to buffer extreme labor deficits
